SIKKIM • STATE POLLUTION CONTROL BOARD

E-Waste Management Dashboard

Generation, Collection & EPR Performance — FY 2026 (data as of 24–30 Jul 2026)

Reporting basis: **E-Waste (Management) Rules, 2022, Schedule I**
Coverage: **6 districts** · Gangtok, Gyalshing, Mangan, Namchi, Pakyong, Soreng

TOTAL GENERATED
310.5 t
310,500 kg across 6 districts

TOTAL COLLECTED
18.2 t
only 5.9% of waste generated

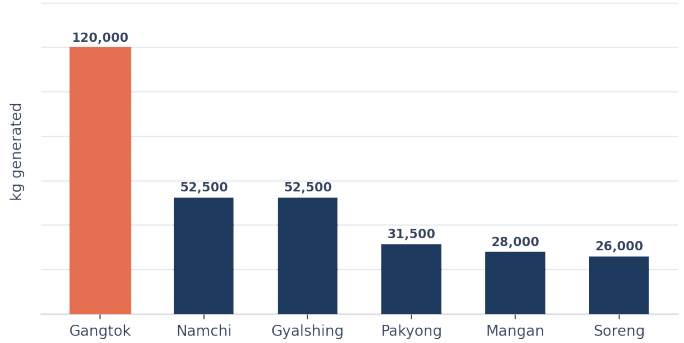

EPR ACHIEVEMENT
83.9%
12,500 / 14,900 kg target

COMPLIANT PRODUCERS
12 / 20
60% fully compliant · 2 penalised

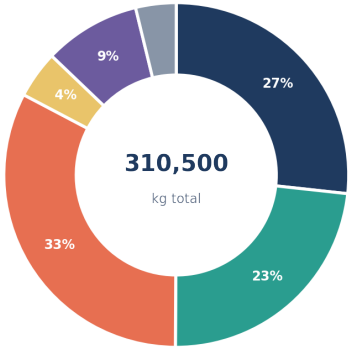

COLLECTION CENTERS
8
registered across all districts

Waste Generated by District (kg)

Gangtok alone contributes 39% of state generation — urbanisation, offices & institutions concentrated there

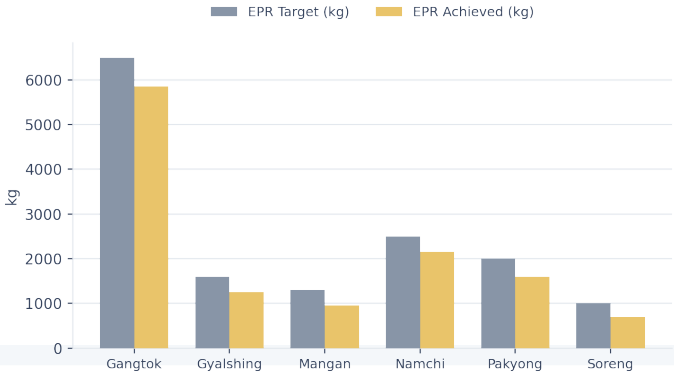

Generation Mix by Category

- IT & Telecom — 83.0t
- Consumer Elec. — 72.5t
- Large/Small Eqp. — 101.3t
- Lighting — 13.8t
- Batteries — 28.1t
- Other — 11.8t

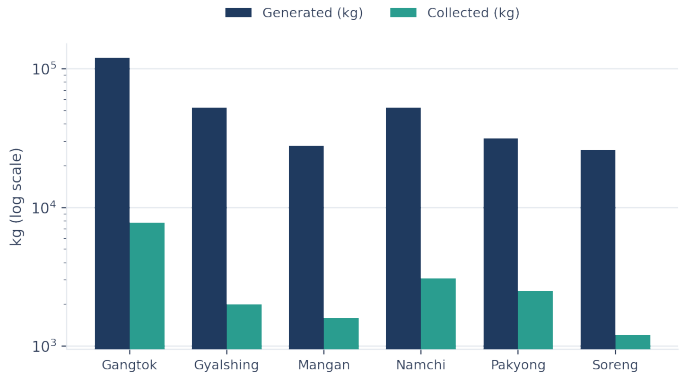

EPR Target vs. Achieved by District (kg)

Achievement trails target in every district; Namchi & Mangan closest to goal

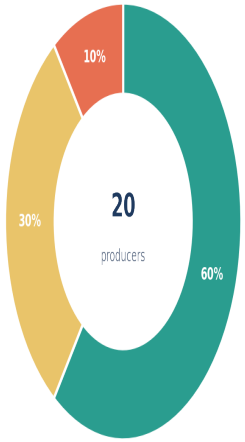

Generated vs. Collected (log scale)

Collection lags generation by an order of magnitude in every single district

Producer Compliance Status (20 registered)

Compliant — 12 (60%)
All requirements met; routine monitoring only.

Partial — 6 (30%)
Awaiting inspection/documentation (Dell, ASUS, Xiaomi, Realme, Haier, Havells).

Non-Compliant — 2 (10%)
Lenovo & OPPO — shortfall in collection target, penalty action initiated.

⚠ **Key gap:** Of 310.5t generated, only 18.2t (5.9%) is formally collected. Large & Small Equipment (101.3t) is the single biggest category and largely uncaptured by current channels.

SIKKIM • STATE POLLUTION CONTROL BOARD

Recycling Infrastructure, Informal Sector & Outreach

Authorised recyclers, hotspot formalisation, environmental health & awareness reach

Informal hotspots identified: **3** | Authorised recyclers: **3**
Awareness programs run: **3** | Districts still uncovered: **Gyalshing, Mangan**

INSTALLED RECYCLING CAPACITY
1,100 t/yr
across 3 authorised facilities

QUANTITY PROCESSED
690 t
avg. material recovery 79%

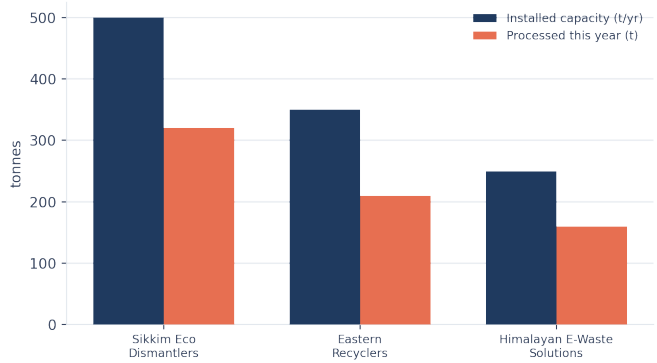

INFORMAL WORKERS IDENTIFIED
97
only 41 (42%) registered/trained

ENV. MONITORING SITES
3
1 site: minor contamination

AWARENESS REACH
1,580
people across 3 campaigns

Recycler Capacity vs. Quantity Processed (tonnes)

Utilisation: Sikkim Eco 64% · Eastern Recyclers 60% · Himalayan E-Waste 64%

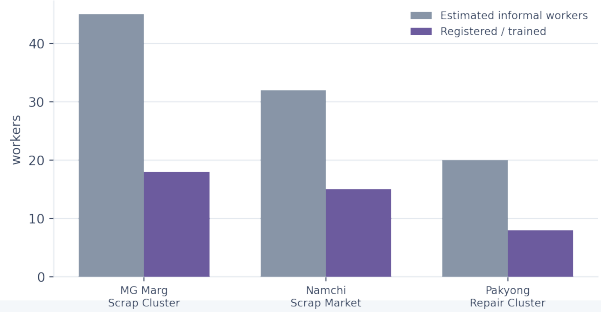

Recycler Detail

Recycler	District	Capacity	Processed	Recovery	Valid Till
Sikkim Eco Dismantlers	Gangtok	500 t	320 t	81%	31-03-2028
Eastern Recyclers	Namchi	350 t	210 t	79%	31-03-2029
Himalayan E-Waste Solutions	Pakyong	250 t	160 t	77%	31-03-2029

Informal Sector Formalisation Progress

Registered/trained share: MG Marg 40% · Namchi 47% · Pakyong 40%

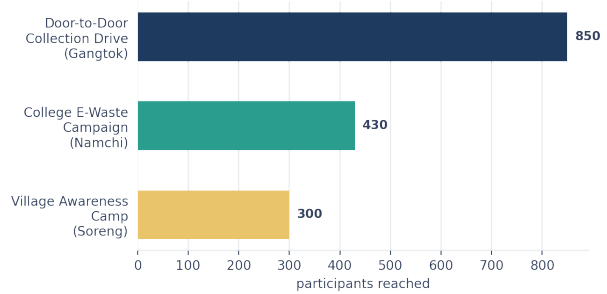

Environmental Health Monitoring

Site	Type	Result	Health Camp	Screened
MG Marg Scrap Cluster	Air Quality	Within Limit	Yes	120
Namchi Scrap Market	Soil	Within Limit	No	0
Pakyong Repair Cluster	Water	Minor Contamination	Yes	75

Awareness Program Reach

Households remain the largest audience segment reached to date

✓ **Working well:** EPR achievement is at 84% of set targets and material recovery rates (77–81%) are healthy at all three authorised recyclers.

⚠ **Priorities for next quarter:**
1) Expand collection infrastructure — capture rate is just 5.9%.
2) Extend recycler network / collection to Gyalshing, Mangan & Soreng (currently unserved).
3) Scale informal-sector training — 58% of identified workers remain untrained.
4) Run awareness campaigns in Mangan & Pakyong, the two districts not yet covered.
